Multitude of Portals | Hubs | Websites

Unifies Relevant Disparate Trusted Data

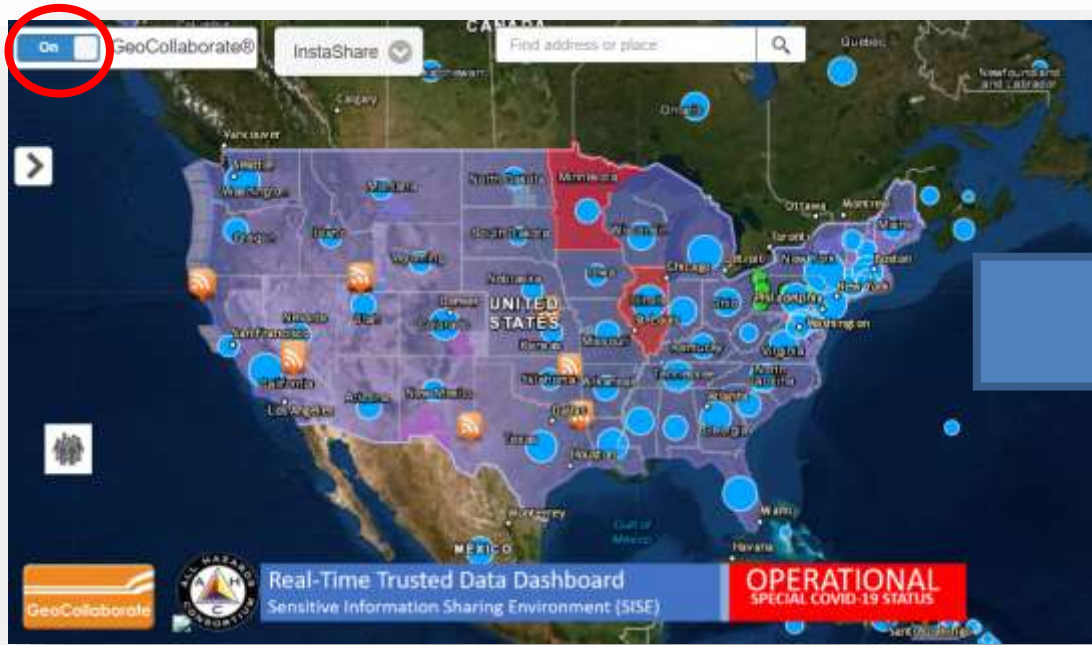

Simple Display controlled by ON/OFF switch

Many websites offering pieces of trusted information

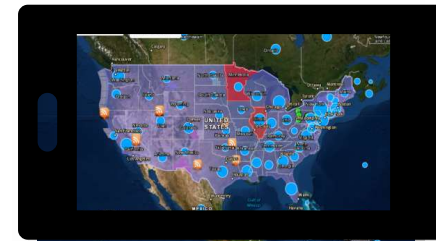

Unification of Trusted Data from Disparate Sources, in real-time, onto any map

GeoCollaborate: Operationally Sharing Across Platforms

Emergency Operations

Responders

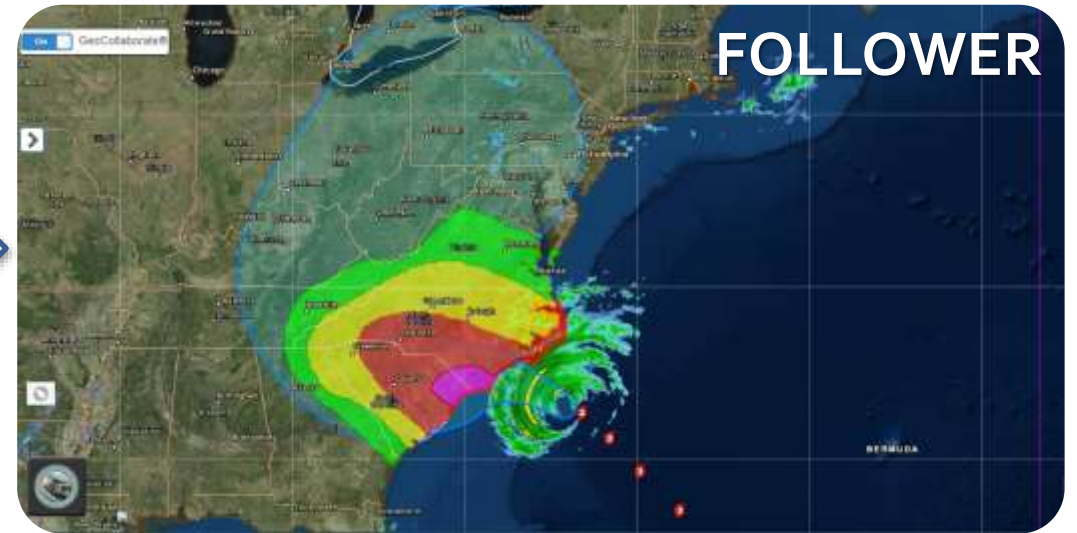

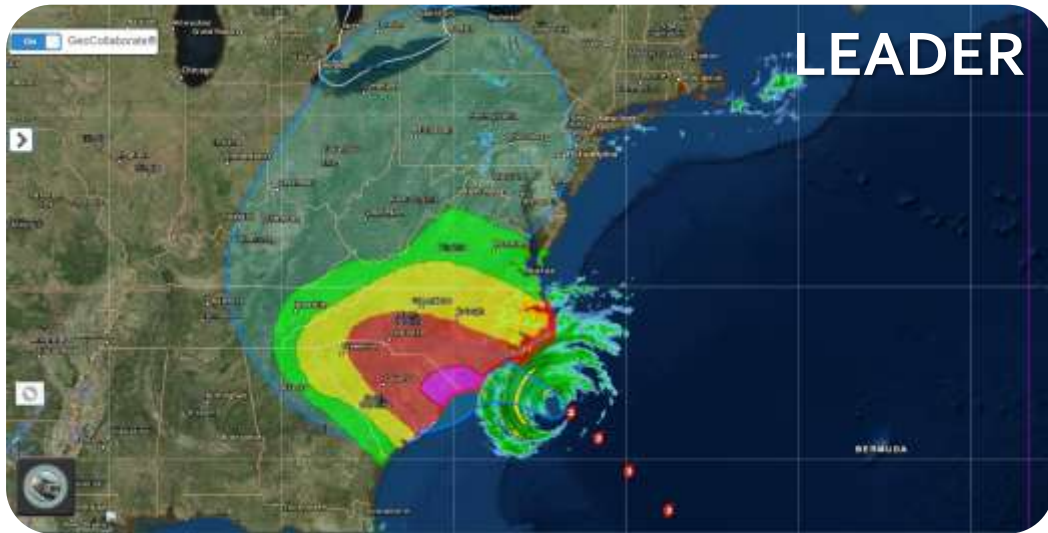

Media

Data shared across any device

Deliver Trusted Data from disparate sources, in real-time, onto any map

GeoCollaborate | Putting Data to Work

ACTIVE COLLABORATIVE SESSION

Subject matter expert (SME) identifies relevant datasets, interprets them & provides impact-based decision support services

Many analysts spend 80% of their time just looking for data with 20% left for putting it to use | Unlock time for more analysis

Increasing the Value of City Data Holdings

- **Turbocharging** city, state, federal and private sector data holdings
- **Increasing interaction** between City Hall & private sector, academia and agencies
- **Improving** webinars on how city data holdings can support planning, response, recovery, plus...
- **Establishing** Trusted Citizen Dashboards
- **Cross-Sector Planning** on Infrastructure, Weather & Climate Resilience, Transportation, Energy, Food, Communications
- **Seamless** data access and sharing, with or without GIS expertise

Improving Cross-Town Information Sharing

- Coordination & Planning Improvements
- Connect with decision makers together through multiple offices LIVE via GeoCollaborate
- Breaking down barriers to key data access
- Planning for Resilience across borders
- Engagement for citizens and professionals
- Increasing private, public and academic sector engagement and information sharing

Connecting geographically dispersed decision makers to accelerate use of critical information
