Ready-to-Fund Resilience Toolkit >

Two key frameworks in the Toolkit

~8 years of supporting municipal planners

Public-private partnership to support local communities' resilience planning

30+ communities have used the planning framework over the last 6 years

5:1 benefits-to-cost ratio for communities using the StR that implement these resilience plans.*

Fostering collaboration in the 'Resilience Ecosystem'

FEDERAL SCIENCE & DATA EXPERTS

Provide research, data, modeling, analysis & impact assessments of past & future climate

CLOUD HOST SERVICES

Offer big data hosting, computation, & public browse, formatting, access services

DESIGNERS OF GIS & ANALYTIC TOOLS

Bring data & analysis tools from federal & local sources together in geospatial context

DECISION MAKERS

In gov't, business, & resources mgmnt — responsible for local planning & action to protect people and property

ADAPTATION PRACTITIONERS

Offer guidance and translation services to help communities & businesses plan & take action

The USCRT's 5 'Steps to Resilience' (learn [more»](#))

A co-production of knowledge process that synthesizes information from multiple sources to...

1 EXPLORE HAZARDS

Identify & map exposure of all valued assets to climate-related hazards.

2 VULNERABILITY & RISK

Assess vulnerability & risk for all valued assets threatened by climate hazards. Rank most urgent threats to address.

3 OPTIONS

Brainstorm & list all options for reducing risks.

4 PRIORITIZE & PLAN

Rank options based on BCR assessment, select options to implement, define success metrics, & make an action plan.

5 TAKE ACTION

Obtain funds, implement plan, monitor results, iterate as needed, & report progress & outcomes.

LOCAL, REGIONAL, TRIBAL, & STATE DATA & INFORMATION

1 EXPLORE HAZARDS

2 VULNERABILITY & RISK

3 OPTIONS

4 PRIORITIZE & PLAN

5 TAKE ACTION

CMRA Portal Introduction Current Hazards Assessment Tool Hazard Information Federal Policies Open Data

Climate Mapping for Resilience and Adaptation Portal

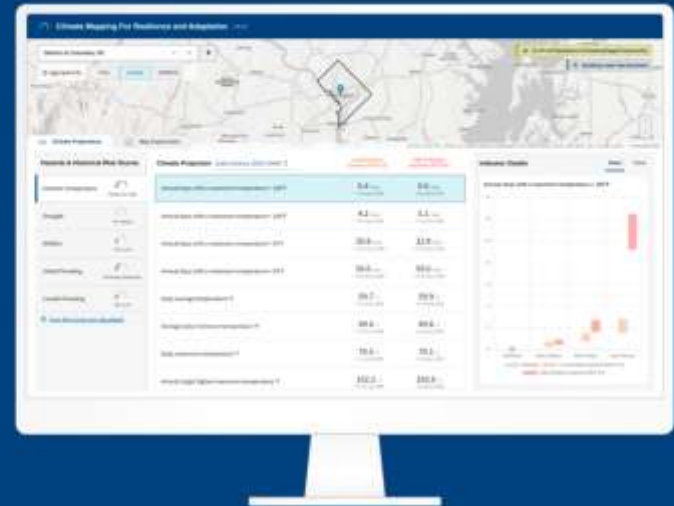

How can CMRA support your needs?

Understanding the exposure of people, property, and infrastructure to climate-related hazards is the first step in building resilient communities. The CMRA resources are meant to support these initial workflows for many different types of users. State, local, and tribal planners, along with community organizations, will find the information to support applying for federal funding, while others will begin to understand the potential threats of climate change on their daily lives.

CMRA Assessment Tool

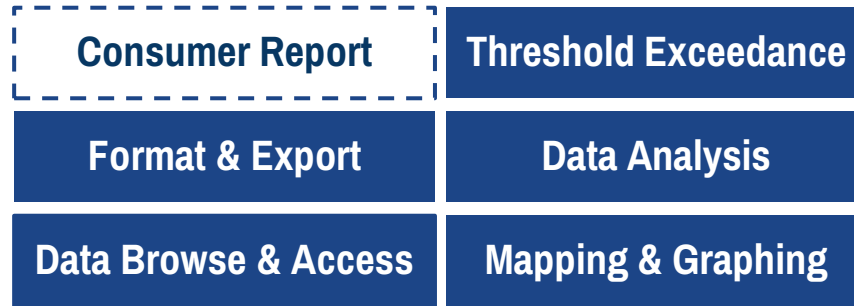

The CMRA Assessment Tool provides information on past, present, and future climate conditions. Use it to understand exposure to climate hazards in your area so that you can effectively plan and build more resilient communities and infrastructure. [Explore the user guide.](#)
